Exploring the Earth Summer Camp

Are you interested in learning about how the Earth works?

NC State University, through the Department of Marine, Earth, and Atmospheric Sciences, is offering a **FREE** week-long summer day camp*. Students will learn about various geoscience topics, careers, and participate in laboratory research activities.

When: **June 15-19, 2019**
Where: **NC State, Jordan Hall, Raleigh, NC**
Who is Eligible: **High School Students**

Students will be exposed to research in geology, marine science, and atmospheric science and will participate in research activities in each area. Faculty and counselors from the Marine, Earth, and Atmospheric sciences department at North Carolina State University will lead the presentations, activities, discussion, and lab tours. The camp will include several local field trips, including trips to William B. Umstead State Park, WRAL, and NCSU's own aquaculture (i.e., fish-farming) facility.
